

**Session/Course Title: Business Strategy**  
**Date: January 17, 2007; 9:00 am**  
**Instructor's Name: Christian Poehlmann**

Please offer specific suggestions for ways we could design the session to better meet your needs:

- Also show what needs can be met by the normal university library site.
- More hands on.
- Find a way to make it less boring.
- More entertaining.

How could we improve our session handouts?

- None necessary.

What could the instructor do in the future that might improve your understanding of the material?

- I've seen this presentation before, but this presenter is much clearer and more precise.
- He knew what he was talking about. Taught clearly, effectively, and simply.
- Speak louder and be more enthusiastic.
- Quite helpful and explained the uses and possibilities very well. Something I will be using this semester for sure.

Additional Comments:

- Great demonstration of resources! Very helpful!
- Since we pay so much money for these search engines we should teach students how to use these databases freshmen year.
