

Session/Course Title: EMBA Orientation – Gold Group

Date: January 05, 2007

Instructor's Name: Stephen Hayes

Please offer specific suggestions for ways we could design the session to better meet your needs:

- Tough to have at the end of a long day.
- Present info during orientation vs. five day immersion week.
- Not at the end of a busy day!
- Do not conduct at the end of day when everyone is worn out.

How could we improve our session handouts?

- Screen shot would be helpful to remember info later.
- Start with what services are being provided.
- Additional cardboard condensed cards to go to.
- Fine.

What could the instructor do in the future that might improve your understanding of the material?

- N/A – he was helpful, outstanding, and offering further assistance.
- Provide follow up session maybe a month into the program to help drive home the data available and navigation.
- More detailed examples in handout/presentation. I'm not sure exactly what potential options I will have or need.
- Seems rushed at times; more practical examples (like with a specific class).
- Don't schedule at the end of a Freshman or 1st yr hours day (I know this wasn't your choice).
- He was great, but having the class at Senior pm did not provide for the best learning environment (i.e. I am not that eager to learn after 12 hours of class).

Additional Comments:

- Outstanding.
- It was very hard to retain this info after Freshman or 1st yr hours of intense EMBA classes. By Other pm, we were all exhausted.
- Good job. Looking forward to working with you and your team.
- Great One-Stop for research information! Thanks!
- Tough to have at the end of a 11 hour day.
- Very tough to follow on the heels of a 12-hour day.
- The BIC is awesome and I look forward to utilizing info.
